Software Development Live Cycle (SDLC) Service List

List Of Services

SDLC Disciplines	CLM Tool	Service
Requirement Management	IBM Doors Next Generation (DNGR)	Formalize discipline with Requirements Management Plan (RMP); Required Environments (Architecture Diagram);Install & configure software (DNGR) Implement RMP, Complete Pilot Project and provide team training
Change Management & Defect Tracking	IBM Rational Team Concert (RTC)	Formalize discipline with Change Management Plan (ChMP); Required Environments (Architecture Diagram); Install & configure software (RTC) Implement ChMP, Complete Pilot Project and provide team training
Version Control	IBM Rational Team Concert (RTC)	Formalize discipline with Configuration Management Plan (CoMP); Required Environments (Architecture Diagram); Stream Strategy, Component Strategy; Install & configure software (RTC) Implement CoMP, Complete Pilot Project and provide team training
Build Management	IBM Rational Team Concert (RTC)	Formalize discipline with Build Management Plan (BMP); Required Environments (Architecture Diagram);Install & configure software (RTC) Implement BMP, Complete Pilot Project and provide team training
Quality Assurance (QA)	IBM Requirement Manager (RQM)	Formalize discipline with Test Management Plan (TMP); Required Environments (Architecture Diagram);Install & configure software (RQM) Implement (TMP), Complete Pilot Project and provide team training
Deploy Management	IBM Urban Code Deploy (UCD)	Formalize discipline with Deployment Management Plan (DMP); Required Environments (Architecture Diagram);Install & configure software (UCD) Implement (DMP), Complete Pilot Project and provide team training
Release Management	IBM Urban Code Release (UCR)	Formalize discipline with Release Management Plan (RMP); Required Environments (Architecture Diagram);Install & configure software (RCD) Implement (RMP), Complete Pilot Project and provide team training
